GENERAL INFORMATION

The Office of Statewide Health Planning and Development (OSHPD) produces a data file which contains 300 elements of utilization data from the Annual Utilization Report of Long Term Care (LTC) facilities.

The data file includes utilization information from each of California's Long Term Care facilities. OSHPD staff reviews each report and corrections are made to the data in consultation with the LTC facility staff. Once the reports are completed, the database is closed and made available to the public.

Data Availability

The data file available on the OSHPD Internet site covers the 1999 calendar year: January 1, 1999 – December 31, 1999. The full database for Individual Long Term Care facility utilization is also available on diskette, magnetic tape, or cartridge. Contact the OSHPD Sales, Marketing and Production Section at (916) 322-2814 if you would like to obtain this product.

Documentation

This Internet version of the documentation includes the definitions of the data elements from Annual Utilization Report of Long Term Care Facilities and a description of each data element (field). The most recent file contains 300 data elements (not all of which may be present for every facility) submitted by 1257 facilities.

Standard Data File Format

Due to the number of data items, the data are separated into two files. File one (ltc9901.txt) contains basic long term care facility identification information and the data items from report pages 0 through 4; file two (ltc9902.txt) contains the data items from report pages 5 through 6.

The files have been compressed and are in a comma-separated text (TXT) format for use in spreadsheet and database applications. SAS and other statistical programs can also read the files. The first row will contain column titles that can be used as database names or spreadsheet titles.

If you are having or believe you will have trouble processing the TXT file format, please contact a technical representative in Sales, Marketing and Production at (916) 322-2814, and indicate your concerns. We attempted to produce a data product that will meet the needs of most data users, but do not want to exclude anyone from gaining access to the data. If your question is more of a technical nature, having to do with operation of spreadsheet software, please address them to the software manufacturer's technical support line.

Data File Description

Each line (row) represents one Long Term Care facility. The 300 data elements (columns) represent the data for 1257 LTC facilities.

Data File Specifications

In the Data File Specifications that follow, these data format representations are used:

Item No.----Each data field is assigned an item number, which is referenced consistently throughout this documentation.

Column-----Indicates the column in which the data item is located if the file is imported into a spreadsheet.

Field Title---The title of each data item that can be used as database names or spreadsheet titles. We limited the titles to eight characters.

Data Item----Most titles are numeric, which represent the report page, line, and column of the data item.

Data Type---Indicates if field is TEXT, NUMERIC or CODED, as defined below:

TEXT Alphanumeric Alphabetic and/or numeric data, left justified, and

space filled

NUMERIC Numeric Only numeric values, no

punctuation, right justified, and left space filled

(leading hyphen for negative sign)

CODED Coded data Data is coded directly from the in house Licensing

File System (LFS)

Field Size--Indicates the maximum field size.

Data Field Definitions

This section contains the definitions of the data items, listed by Item Number.

DATA FILE SPECIFICATIONS

This section contains the data file specifications for the data fields. For each data item, it specifies: 1) the number of the data field (Item No.); 2) a spreadsheet column reference (Column); 3) the title of the field (Field Title); 4) the data item's name (Description); 5) the type of data (Data Type); and 6) the size of the field (Field size).
